KEPI Immunisation Schedule, Kenya 2026

Routine childhood vaccines by age · Focus Clinical & Diagnostics Centre

Age	Vaccines
At birth	BCG, oral polio (OPV 0)
6 weeks	OPV 1, pentavalent 1, pneumococcal (PCV) 1, rotavirus 1
10 weeks	OPV 2, pentavalent 2, PCV 2, rotavirus 2
14 weeks	OPV 3, pentavalent 3, PCV 3, inactivated polio (IPV)
9 months	Measles-rubella, yellow fever (where recommended)

Your child's clinic may add or adjust vaccines as national guidance changes. Always follow your *Road to Health / My Child* card and confirm with the nurse at each visit. Official schedule: Kenya Ministry of Health (health.go.ke).
